NOVIPRO™ ROUGHSAWN CEDAR PANEL

FAST-
series FIT

Built to outlast what nature has built for generations to come

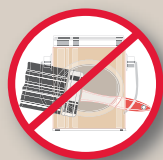

NOVIK
INNOVATIVE POLYMERS

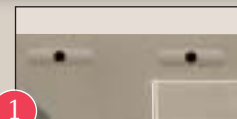

New Performance Features

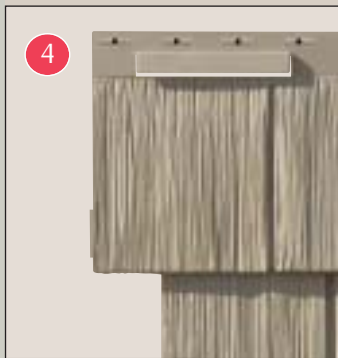

- Replicates the deep-grained look and feel of real roughsawn cedar shingles with added performance and characteristics that will withstand the test of time.
- Made of injection molded copolymer for superior quality.
- Resists warping and impact at extreme temperature variations.
- Standard color-thru panel with UV stabilizer to prevent discoloration.
- Superior quality coating on blended colors.
- Accessories available in matching colors: (ex. Corners, starter strips, J-channels).
- Products from different production runs can be mixed and matched.
- Easy to install.

Color-thru
No paint required-ever
Virtually maintenance-free

1 Nail locators that facilitate installation by indicating precise nail locations.

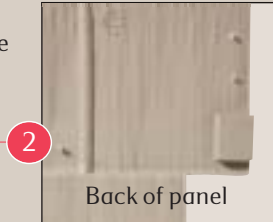

Superior interlocking system designed and tested to withstand hurricane windload.

4 Panels are held securely in place with extra long lock tabs that engage easily for faster and easier installation.

Break away horizontal expansion pins that eliminate the temperature guide.

NOVIPRO™ ROUGHSAWN CEDAR PANEL FAST-series FIT

Built to outlast what nature has built for generations to come

We recognize the attractiveness of real wood with its richness and subtle color hues for homeowners. Unfortunately, wood cannot stand the test of time. Stain and paint wear will put an end to its original curb appeal and make it very costly to bring it back to its younger days.

Your home certainly deserves better. And with the NOVIPRO™ Roughsawn Cedar siding system, wood is no longer an option. Our system offers the same warm and authentic look of real cedar shingles without the costly and time consuming maintenance.

With the largest selection of solid and blended colors available on the market, the NOVIPRO™ Roughsawn Cedar siding system will never fail to deliver impressive results on the whole house or on attention-grabbing elements, such as gables and end walls.

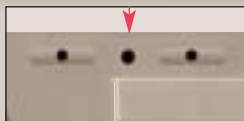

Testing performed

Test	Standard testing	Result for NOVIPRO™
Fire rating	In accordance with E84	Class C fire resistance
Impact	In accordance with ASTM3679	Pass
Accelerated U.V. exposure	In accordance with ASTM1435	Virtually no fading
Wind	In accordance with ASTM5206	> 160MPH

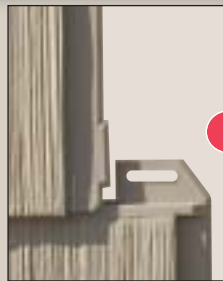

* Certified testing reports by independent laboratories
